MeshRover

Lighting is no longer just light.

MeshRover uses your existing lighting infrastructure as the wireless backbone for intelligent buildings and real-time asset tracking — retrofit-ready, with no new cabling. From wheelchairs and infusion pumps in a hospital to pallets and forklifts in a warehouse, it delivers dependable real-time visibility on the network that's already on your ceiling.

No new cabling

RETROFIT READY

Real-time

ASSET TRACKING

Scalable

MESH NETWORK

CORE FEATURES

- Real-time location of tracked assets
- Room- or zone-level visibility
- Fast search via dashboard or mobile device
- Live availability and usage overview
- Alerts for unexpected movement or loss

KEY BENEFITS

- Less time spent searching, more time for core work
- Improved equipment availability and utilization
- Smooth integration with existing lighting infrastructure
- Scalable deployment across single or multiple sites
- Sustainable by design — no new hardware backbone needed

TYPICAL APPLICATIONS

Hospitals, nursing homes & care facilities · Warehouses & distribution centres · Manufacturing and logistics areas · Multi-building campuses
