ZMS200

Advanced Zhaga motion sensor.

ZMS200 is a Zhaga Book 18 plug-and-play motion sensor that detects presence beneath the luminaire and activates lighting the moment someone passes underneath — with Bluetooth Mesh 1.1 connectivity and daylight sensing for smart dimming built in.

SENSING

CORE FEATURES

- Motion detection and presence sensing
- Bluetooth Mesh 1.1 connectivity
- Daylight sensing for smart dimming
- Zhaga Book 18 plug-and-play
- Compact sensor design for outdoor luminaires
- Fast integration with smart lighting systems

KEY BENEFITS

- Improves energy efficiency through occupancy-based control
- Enables intelligent daylight-responsive dimming
- Supports smart city lighting deployments
- Simplifies luminaire integration and commissioning
- Reliable and secure lighting control

TYPICAL APPLICATIONS

Smart street lighting · Public area and pathway lighting · Parking and perimeter lighting · Outdoor energy-saving lighting upgrades
