

# DATASHEET

# RTM·SENSORHOTEL·NB-IoT.

The RTM·SENSORHOTEL·NB-IoT makes it possible to experience the benefits of IoT. With the RTM·SENSORHOTEL·NB-IoT you can make every device and every room smart and connected. In addition to the built-in temperature sensor and vibration sensor, you can also install your own sensors. This makes it possible to measure everything you want to know. The reliable NB-IoT module sends your collected data to your own device.

## Areas of application of the RTM·SENSORHOTEL·NB-IoT include:

---

- Agriculture
- Traffic control installations
- Machines
- Distribution stations
- Roll up doors
- Bridges

## TECHNICAL PRODUCT DESCRIPTION:

---

### Input voltage

8100 mAh

### Ambient temperature

-20°C to +60°C

### Built-in sensor 1

Temperature

### Built-in sensor 2

Vibration
